

Recommended For Use With These
Fine Decatur Electronics Products:

- Genesis Handheld Directional
- Genesis VP-Directional
- Railmaster-VP
- SI-2

Portable LED Sign Radar Display Sign

The Portable LED Sign is your solution to traffic management on a limited budget. At 1.5" thick, it is designed to conveniently fold up to the size of a briefcase and placed in a protective pouch (optional). With optional padded magnets to put your sign securely on the surface of your stationary vehicle, the Portable LED Sign is your quickest, easiest traffic management tool for deployment within minutes. What's more, the sign is powered by your vehicle's 12-volt power supply, making set-up and operation simple. In addition to highly visible bright LED alert and speed displays, the Portable LED Sign also offers directional arrows to divert vehicles away from the scene of an accident. Matched with Decatur's law enforcement or special applications radar units, the sign can display the speed of an oncoming vehicle. For specialized applications, the portable size of the sign allows for easy installation in diverse heavy traffic areas, including factory floors, loading docks, and high traffic industrial locations.
